Higher Education Pros & Cons: Challenges

Ms. Seema Jain* & Dr. Pawan Kumar Dhiman**

ABSTRACT

The millennium of new era of higher education in India demands country's resources of human potential to its fullest. In the recent decades this sector has made tremendous growth in terms students intake and mushrooming of institutions both in private and public sector. The present educational structure in our nation remained inadequate to build potential human resources required for self-reliant and socio-economic development. And our education sector in the 21st century has brought several issues pertaining to employability and quality as well. This paper is an attempt to address growth of enrollment and outcomes such as quality education, efficiency and access to higher education in the country.

Introduction

Some Indian universities namely Taxila, Somapura and Nalanda University were recognized as institutions of prominence during the ancient time. Since independence this sector made tremendous growth. Due to participation of private sector it has brought a revolution by transforming the education system. This speedy growth from various aspects including capacity and
